

How long has each one been in C.G.  
How much outreach is occurring?

## Cell Group

### Strategic Questions

What challenge do you give? Vision?

#### Outreach

1. Do you regularly talk about and pray for specific people that you are evangelizing?
2. Do you recognize and praise all attempts at evangelism? Are evangelistic successes highly esteemed?
3. Do you help people with their outreach by talking over the situation and giving advice about how to work with the person?
4. Do you teach on evangelistic principles and methods periodically?

#### Follow-up (those attending meetings, but not yet incorporated)

1. Do you ascertain that someone takes primary responsibility for each new person? This responsibility involves praying for that person, contacting them outside of meetings as appropriate - with the goal of inviting them into cell group when they are saved, coming to home church and wanting to grow and serve.
2. Do you help the above people with their follow-up by talking the situation over? What is needed before the person could be invited into cell group? What is the best way to accomplish these things?

#### Teaching In the Cell Group

1. What are you teaching now? Why are you teaching this? What identified needs does it meet? How is this series going in meeting those needs?
2. What do you plan to teach next? Why?
3. Is doctrinal material taught with practical application for both them and those to whom they minister? Is ministry equipping material taught (i.e., evangelism, counseling, etc.)?

3. Do teachers get help with preparation? Do they get feedback? *Does everyone participate*

#### Duplication

1. Is there a consensus among HCL's and CGL's on who your future CGL's should be? What qualities exist that make these people the best candidates?
2. Do they have a vision to become leaders? Do they want to? Do they have some idea of what it will take to become leaders?

How many times have you been to the  
CCC? (circle number)

What challenge do you give to visitors?

Does everyone

participate

3. Are you spending time with them to teach them how to pray, how to think through ministry, how to have victory over their own sin-problems? Do you urge them to take course work?

### **Split Plan**

1. Remember the need for balanced ministry on each side (outreach possibilities, new people, workers, teachers, leaders, etc.).
2. As it becomes appropriate, are you forming the people into a "cell within a cell?" Do the two groups know who they are?
3. What is needed before a split is viable? What is being done to accomplish these goals?

### **Ministry for Established Non-teachers**

1. Do they have a concrete ministry within the home church that they view as their niche? Do they feel good about this role?
2. Do you recognize their role and esteem it publicly?

### **Problems**

1. What is the major problem(s) that exists in your cell group at the present time (i.e., lack of outreach, poor meetings, serious sin problems in individual members, loss of consensus to omitters, lack of direction, etc.)? Be sure to prioritize problems so that you work on the most serious ones first.
2. What plan do you have for overcoming the serious problem(s)?
